

It has come to my attention that LPFM broadcast services could displace a radio service I listen to and financially support, K-LOVE. K-LOVE is a welcome station here in the San Diego area and many communities throughout the USA. K-LOVE offers a positive influence to my community and is a welcome alternative to "shock" radio and other profit motivated broadcasts that are willing to cross the line to increase ratings. I believe K-LOVE emphasizes kindness, unselfishness, community service, family togetherness, honesty, and other positive character traits. These traits can lead to better citizens of the community and our country. K-LOVE should not be forced off the public airwaves, especially since the public votes its support out of their own pockets through personal donations.
